I am an aspiring Front End Developer with a year of experience through my course. I found my passion for web developing in college, during my 2 year Computing course and decided to continue that path by starting a course to gain experience and advance my skills. I enjoy web developing as I find it satisfying seeing the code transform into a visual product with which you can interact with. I am therefore looking for an opportunity to put my skills into practise and continue learning.

EDUCATION

FrontEnd Plus TheLearningPeople

06/2024 - Present

Online

WORK EXPERIENCE

Warehouse Administrator BOOHOO PLC

09/2022 - Present

Sheffield, UK

Achievements/Tasks

- I have started working at Boohoo PLC back in September 2022, where I started on the basic tasks such as picking. However, due to my fast learning capabilities and hard work, I have since then been on multiple administrator roles which helped me develop my computer skills further.
